

# ASSISTANT SKILLS

## 1) INTENTS

The screenshot shows the IBM Watson Assistant interface for a project named "COVID-19 Information". The left sidebar contains a menu with "Intents" selected. The main area displays a table of 33 intents. The table has columns for "Intents (33) ↑", "Description", "Modified T1", "Conflicts T1", and "Examples T1". The intents listed are:

| Intents (33) ↑               | Description                            | Modified T1 | Conflicts T1 | Examples T1 |
|------------------------------|--|-------------|--------------|-------------|
| #Antibiotics_or_Vaccine      |  | a day ago   |              | 4           |
| #COVID_Case_Count            | Number of cases nearby.                | a day ago   | 2            | 28          |
| #COVID_Cleaning_Disinfecting | How to clean and disinfect.            | 11 days ago |              | 21          |
| #COVID_Comparing_Illness     | Comparing Covid to other illnesses.    | 11 days ago |              | 25          |
| #COVID_Description           | Describe Covid-19.                     | 11 days ago | 2            | 23          |
| #COVID_Event_Shutdowns       | Event shutdowns and business closures. | 11 days ago |              | 21          |
| #COVID_Govt_Emergency        | Government readiness questions.        | 11 days ago |              | 20          |
| #COVID_Illness_Length        | How long Covid lasts.                  | 11 days ago |              | 22          |
| #COVID_Masks_Availability    | Availability of masks.                 | 11 days ago |              | 20          |
| #COVID_Masks_Protection      | Explaining how masks can protect.      | 11 days ago |              | 20          |

### 3) DIALOG

The screenshot shows the IBM Watson Assistant interface for a project named "COVID-19 Information". The left sidebar contains a navigation menu with "Dialog" selected. The main workspace displays a dialog flow with six nodes, each representing a different topic. Each node has a title, a placeholder entity, and a response count. The nodes are:

- Greeting**: #Greeting, 2 Responses / 0 Context Set / Does not return
- Location**: #Location, 2 Responses / 0 Context Set / Does not return
- Hours**: #Hours, 2 Responses / 0 Context Set / Jump to / Does not return
- What is Corona virus?**: #What\_is\_Corona\_virus, 2 Responses / 0 Context Set / Jump to / Does not return
- What are the symptoms of Corona virus?**: #What\_are\_the\_symptoms\_of\_Corona\_virus, 2 Responses / 0 Context Set / Does not return
- How does Corona virus spread?**: #How\_does\_Corona\_virus\_spread, 2 Responses / 0 Context Set / Does not return

The interface includes a top bar with the project name and version, a search bar, and a "Try it" button. The bottom of the screen shows a Windows taskbar with various application icons.

The screenshot shows the IBM Watson Assistant interface for the same "COVID-19 Information" project. The left sidebar shows the "Dialog" menu. The main workspace displays a dialog flow with six nodes, each representing a different topic. Each node has a title, a placeholder entity, and a response count. The nodes are:

- How does Corona virus spread?**: #How\_does\_Corona\_virus\_spread, 2 Responses / 0 Context Set / Does not return
- Antibiotics or Vaccine**: #Antibiotics\_or\_Vaccine, 2 Responses / 0 Context Set / Does not return
- Protection against Corona virus**: #Protection, 2 Responses / 0 Context Set / Does not return
- Self Isolation or Quarantine**: #COVID\_Quarantine, 2 Responses / 0 Context Set / Does not return
- Thanks**: #Thanks, 2 Responses / 0 Context Set / Does not return
- Anything else**: anything\_else, 2 Responses / 0 Context Set / Does not return

The interface includes a top bar with the project name and version, a search bar, and a "Try it" button. The bottom of the screen shows a Windows taskbar with various application icons.

The screenshot displays the IBM Watson Assistant web interface. The main area shows a 'COVID-19 Information' dialog with a 'Development' version. The dialog is structured with a 'Dialog' tab selected, showing a flow of intents and responses. The intents include 'What is Corona virus?', 'What are the symptoms of Corona virus?', 'How does Corona virus spread?', 'Antibiotics or Vaccine', 'Protection against Corona virus', and 'Self Isolation or Quarantine'. Each intent has a corresponding response and a '2 Responses / 0 Context Set / Jump to / Does not return' status. The right sidebar contains a 'Try it out' panel with a 'Hello' intent, a 'Location' intent, and an 'India' intent. The bottom of the screen shows a Windows taskbar with various application icons and a system clock indicating 9:49 AM on 28-May-20.

Corona virus

#What\_is\_Corona\_virus

@Social\_worker:Corona virus

We are available 24x7 until the existence of Corona virus.

Corona viruses are a large family of viruses which may cause illness in animals or humans. In humans, several coronaviruses are known to cause respiratory infections ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). The most recently discovered coronavirus causes coronavirus disease COVID-19.

Coronavirus disease (COVID-19) is an infectious disease caused by a newly discovered coronavirus.

Symptoms of Corona virus

#What\_are\_the\_symptoms\_of...

@Social\_worker:symptoms

@Social\_worker:Corona virus

The most common symptoms of COVID-19 are fever, tiredness, and dry cough. Some patients may have aches and pains, nasal congestion, runny nose, sore throat or diarrhea. These symptoms are usually mild and begin gradually. Some people become infected but don't develop any symptoms and don't feel unwell. Most people (about 80%) recover from the disease without needing special treatment. Around 1 out of every 6 people who gets COVID-19 becomes seriously ill and develops difficulty breathing. Older people, and those with underlying medical problems like high blood pressure, heart problems or diabetes, are more likely to develop serious illness. People with fever, cough and difficulty breathing should seek medical attention

Spread

#How\_does\_Corona\_virus\_spr... @Social\_worker:spread

People can catch COVID-19 from others who have the virus. The disease can spread from person to person through small droplets from the nose or mouth which are spread when a person with COVID-19 coughs or exhales. These droplets land on objects and surfaces around the person. Other people then catch COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth. People can also catch COVID-19 if they breathe in droplets from a person with COVID-19 who coughs out or exhales droplets. This is why it is important to stay more than 1 meter (3 feet) away from a person who is sick.

person who is sick.

Vaccine

#Antibiotics\_or\_Vaccine

No Vaccine is found now. Antibiotics do not work against viruses; they only work on bacterial infections. COVID-19 is caused by a virus, so antibiotics do not work. Antibiotics should not be used as a means of prevention or treatment of COVID-19. They should only be used as directed by a physician to treat a bacterial infection.
